EDUCATION

Chennai Institute of Technology

Bachelor of Electrical and Electronics Engineering

2023 – 2027

CGPA: 8.3

EXPERIENCE

SSV-Traders

May 2024 – June 2024

- Designed and launched a **responsive website** that improved page performance by around **30%** across devices.
- Refined UI components by improving navigation efficiency by nearly **25%** across devices by optimizing layouts, improving interface consistency, and enhancing overall user experience.
- Oversaw **deployment** and maintenance operations, ensuring **99%** uptime and stable performance throughout usage.

Internzo

Nov 2024 – Dec 2024

- Assembled a fully responsive website with **React**, enhancing user engagement by approximately **40%** across platforms by **improving responsiveness**, usability, and overall interaction experience for users.
- Integrated APIs and structured state workflows, boosting system consistency across **10+** core features seamlessly.
- Diagnosed bottlenecks and applied optimizations, reducing **overall load time** by nearly **35%** during testing.

PROJECTS

Messenger | Node.js, gRPC, Redis, Mysql, Sequelize, PubSub

June 2025

- Built fault-tolerant **Redis Streams** achieving **0% message loss** using **ACK-based** processing and retries.
- Structured **role-secured rooms** and threads, enabling organized collaboration for over **500+** active users daily.
- Introduced a **microservices-based** backend architecture, enabling independent service deployment and scalability.

AI-Proctor | Next.js, Node.js, MySQL, MediaPipe, WASM

July 2025 - Nov 2025

- Formulated an **AI-driven proctoring** module capable of detecting **10+** events in **real time** reliably.
- Utilized **WebAssembly** to achieve **2x faster** on-device inference and reduce backend load significantly.
- Established a hierarchical **RBAC** system with **2 admin** tiers to streamline monitoring workflows effectively.

Optimus | Next.js, Hono, Neon DB, Drizzle, RAG

February 2026 - March 2026

- Architected a **roadmap-driven** platform for structured skill progression and **peer-to-peer** collaboration.
- Leveraged the **Hono** framework to build runtime-agnostic APIs compatible with **Node.js** and **edge-based** deployments.
- Built a **RAG-driven** feature enabling contextual explanations for student notes using semantic search.

COMPETITIVE PROGRAMMING

LeetCode : Problems Solved : **900+** | Rank : **Top 3.5%** | Rating : **1952**

CodeChef : Rating : **1674** | Position : **3 Star** | Highest Rank : **768** in contest

Codeforces : Rating : **1234** | Position : **Pupil** | Highest Rank : **2238** in contest

TECHNICAL SKILLS

Languages : Python, C, C++, JavaScript, TypeScript

Frameworks & Technologies : React, Next.js, Node.js, Express.js, GraphQL, Socket.io, WebRTC, LangChain

Databases & Tools : MySQL, MariaDB, PostgreSQL, Sequelize, Docker, Linux, GitHub, Postman

ACHIEVEMENTS

- Orchestrated a **full-stack bootcamp** through the **GDG club**, enabling students to gain skills.
- Secured a **finalist** position at the **SVCE hackathon** by presenting a refined and efficient solution.
- Facilitated **web development sessions** for freshers, helping them grasp essential concepts.
- Won a **3rd** position at the **Threx Hackathon** by delivering an innovative and efficient solution.
